12. [redacted] reported that NPIC had raised a question at COMIREX concerning why so many photographs on the same mission were taken of targets located in the far northern latitudes. As a result of this, the NRO has revised the count down logic so that a target will be deleted when it has reached an acceptable probability of being photographed in clear weather. This logic will start with a 70% probability for priority 9 targets and go up from there based on priority.
